

# PubFlow

a scientific data  
publication framework  
for marine science

Peer Brauer, Prof. Dr. Wilhelm Hasselbring  
Software Engineering Group  
Kiel University  
Lucca, 23.09.2013

The logo graphic for PubFlow shows a globe on the left, a gear in the middle, and a laptop on the right, all connected by horizontal arrows pointing from left to right.

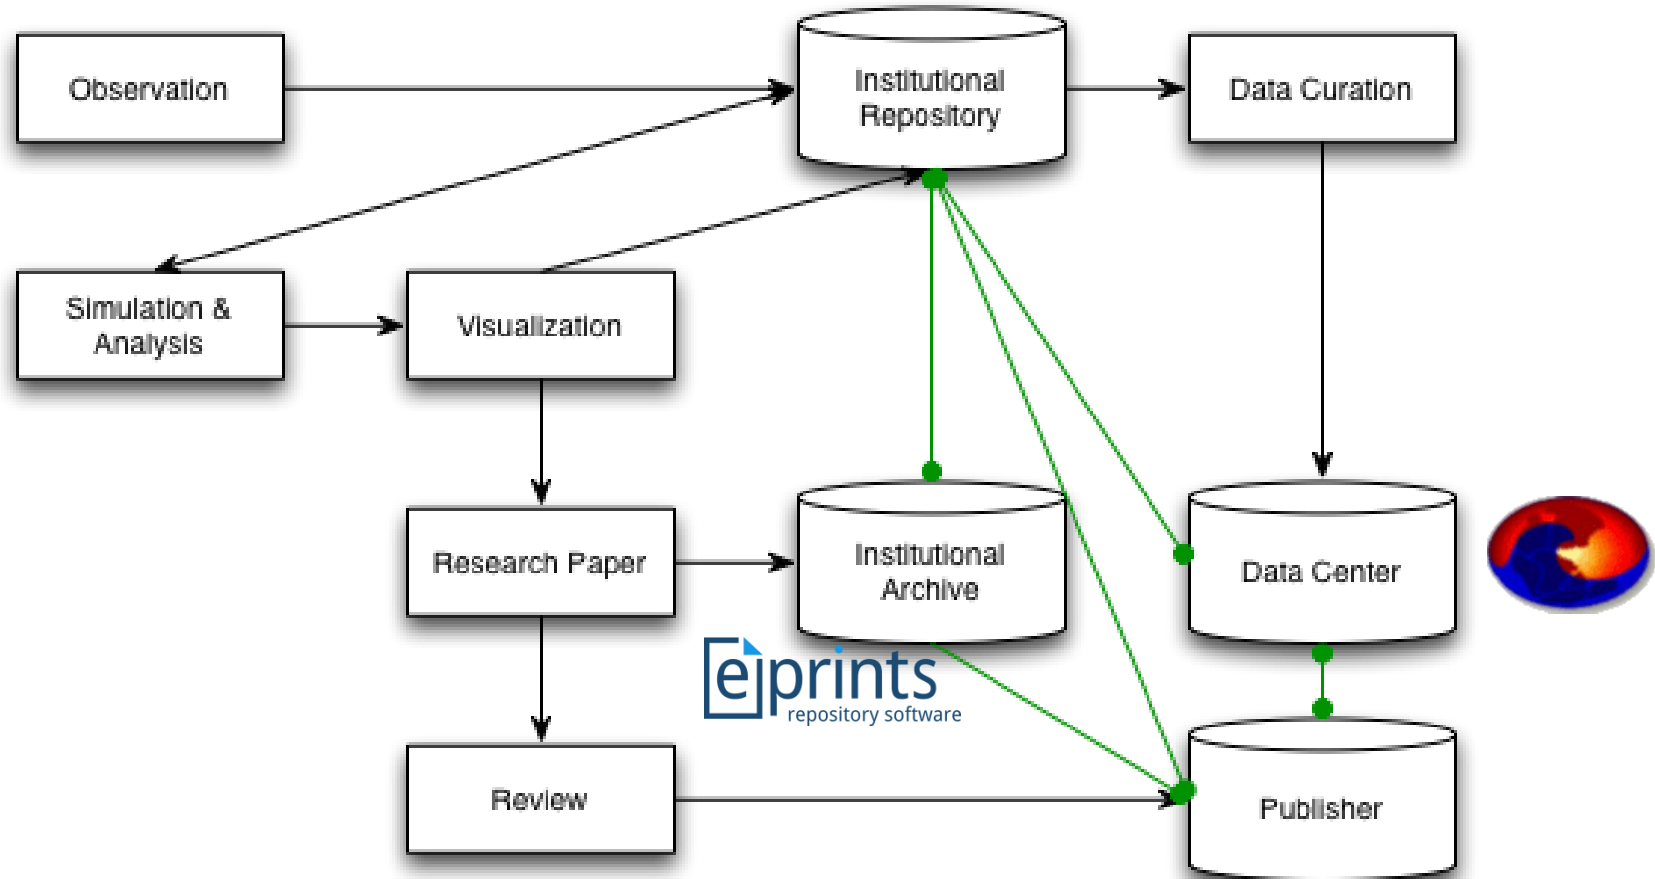

# Motivation

# Motivation

# Motivation

- **Agenda**

1. PubFlow Framework

2. Evaluation Scenario

3. Conclusion

# What is PubFlow about?

- ▶ Creating a scientific workflow environment for data publication
- ▶ Introducing role based working models to the domain of data management
- ▶ Increasing the degree of automation data management

# Features

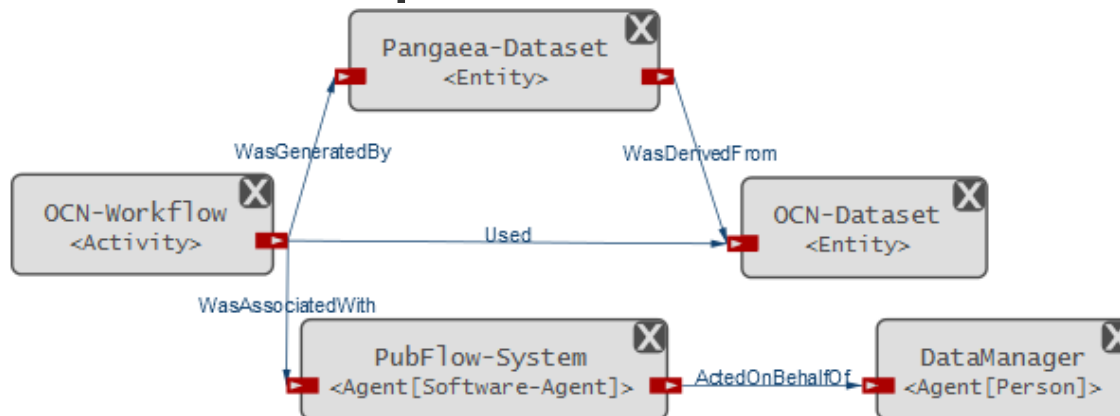

## Build upon proven workflow technology

- ▶ Build in support for BPMN, BPEL
- ▶ Extensible by other workflow engines
- ▶ Designed for high throughput

# Features

## Provenance Awareness

- ▶ Automatically capturing of provenance data
- ▶ Integrated W3C Prov-O compliant provenance archive
- ▶ Workflow based provenance browser

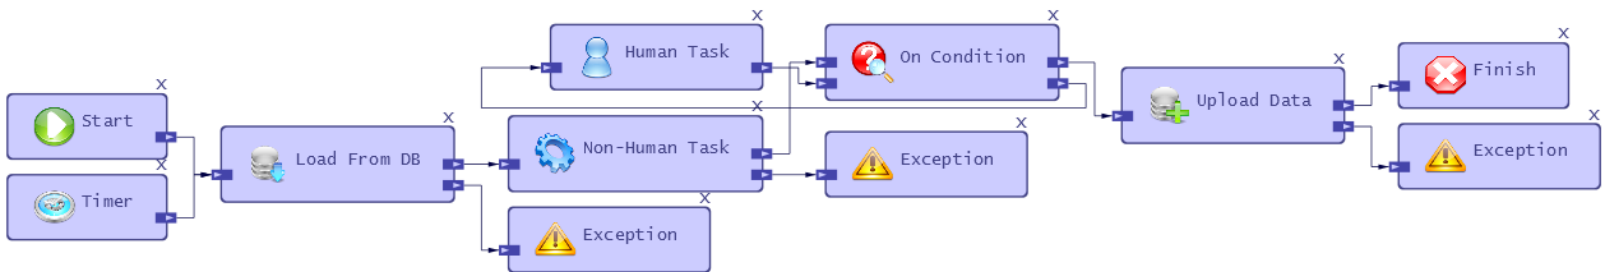

# Features

## Graphical Workflow Editor

- ▶ Supports graphical DSLs
- ▶ Data managers can easily define own workflows
- ▶ Workflows can be transformed to selected target execution environment

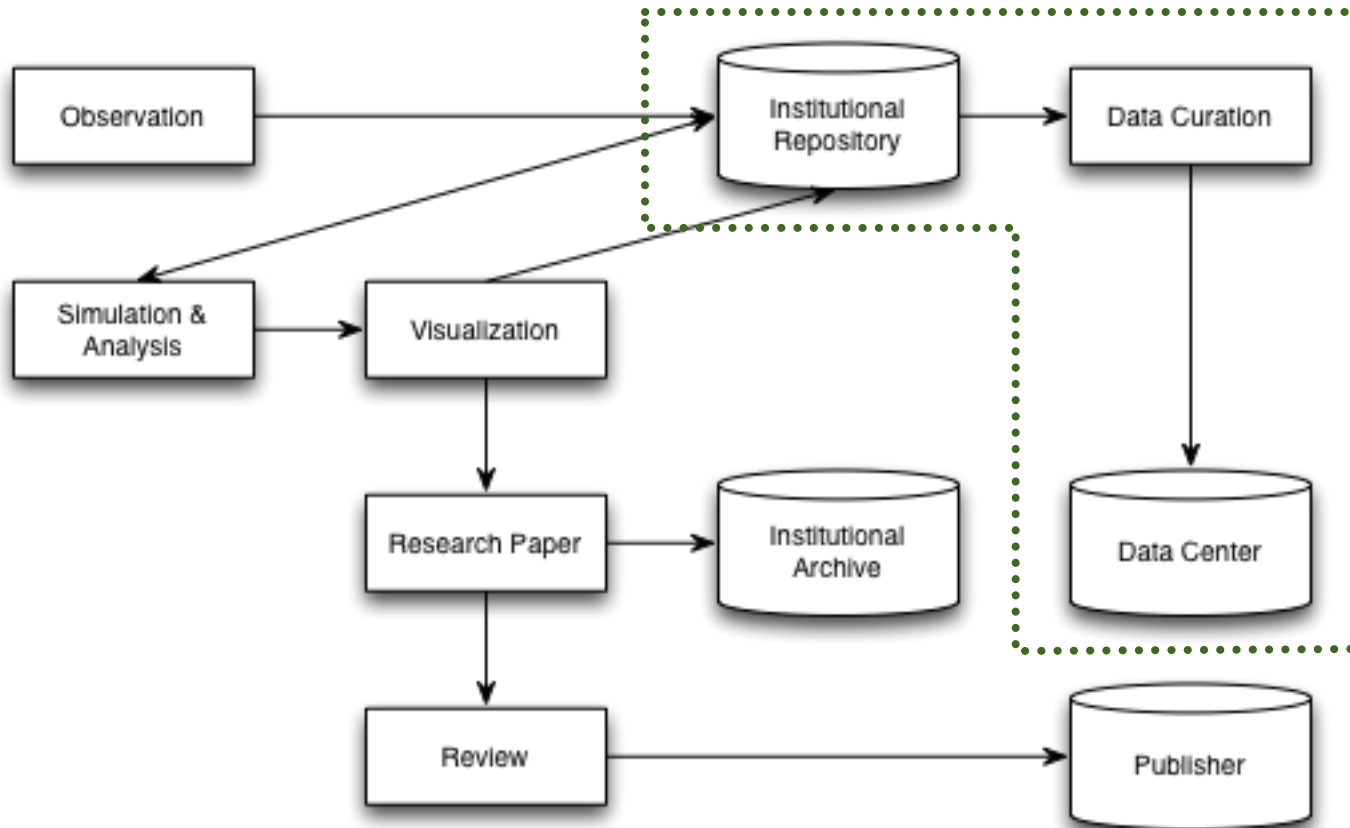

Section 2

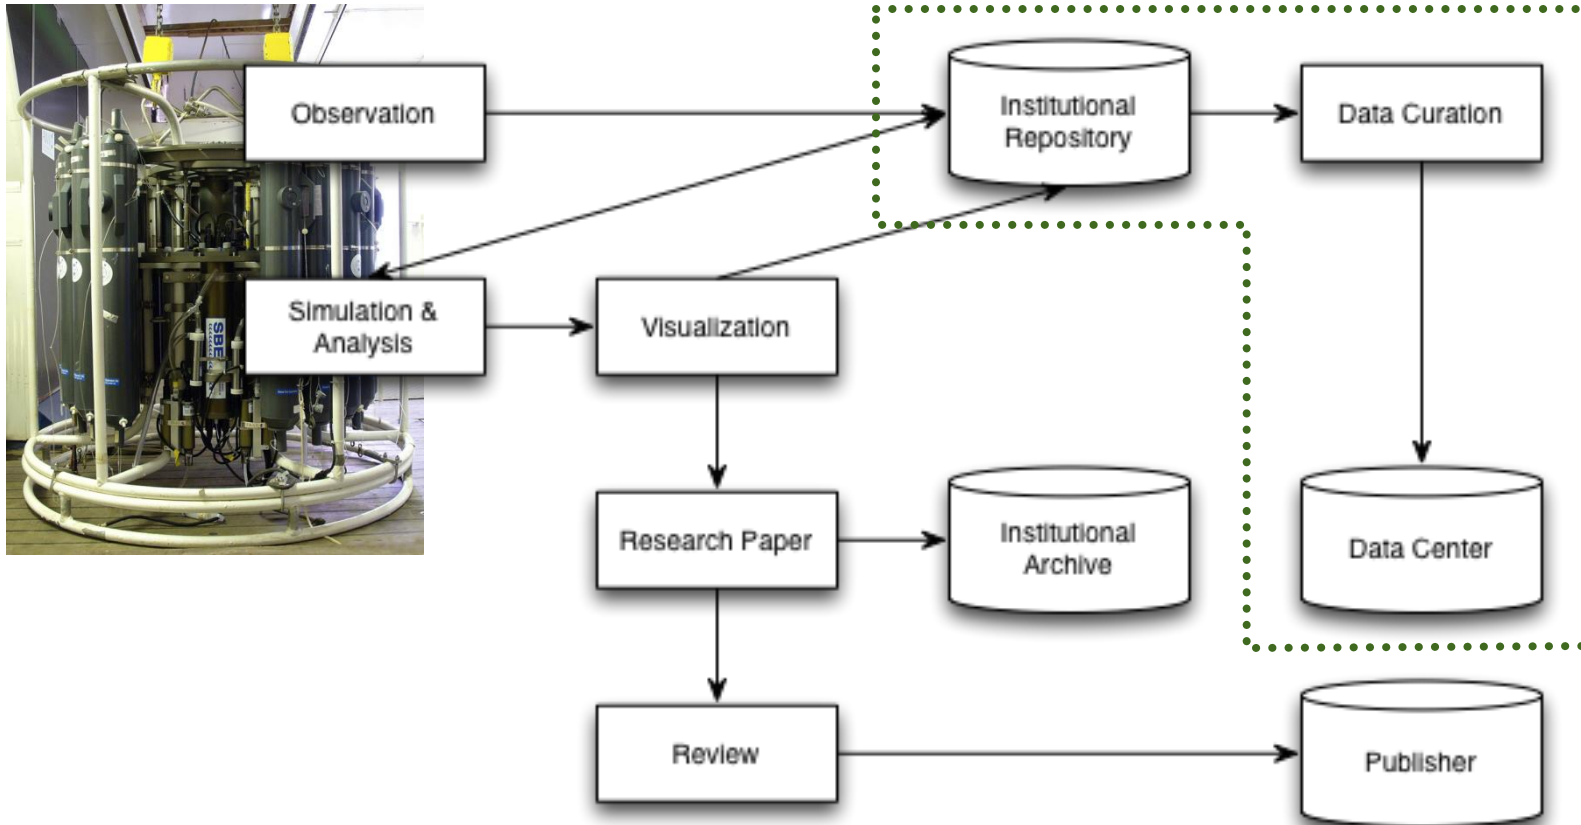

# The Evaluation Scenario

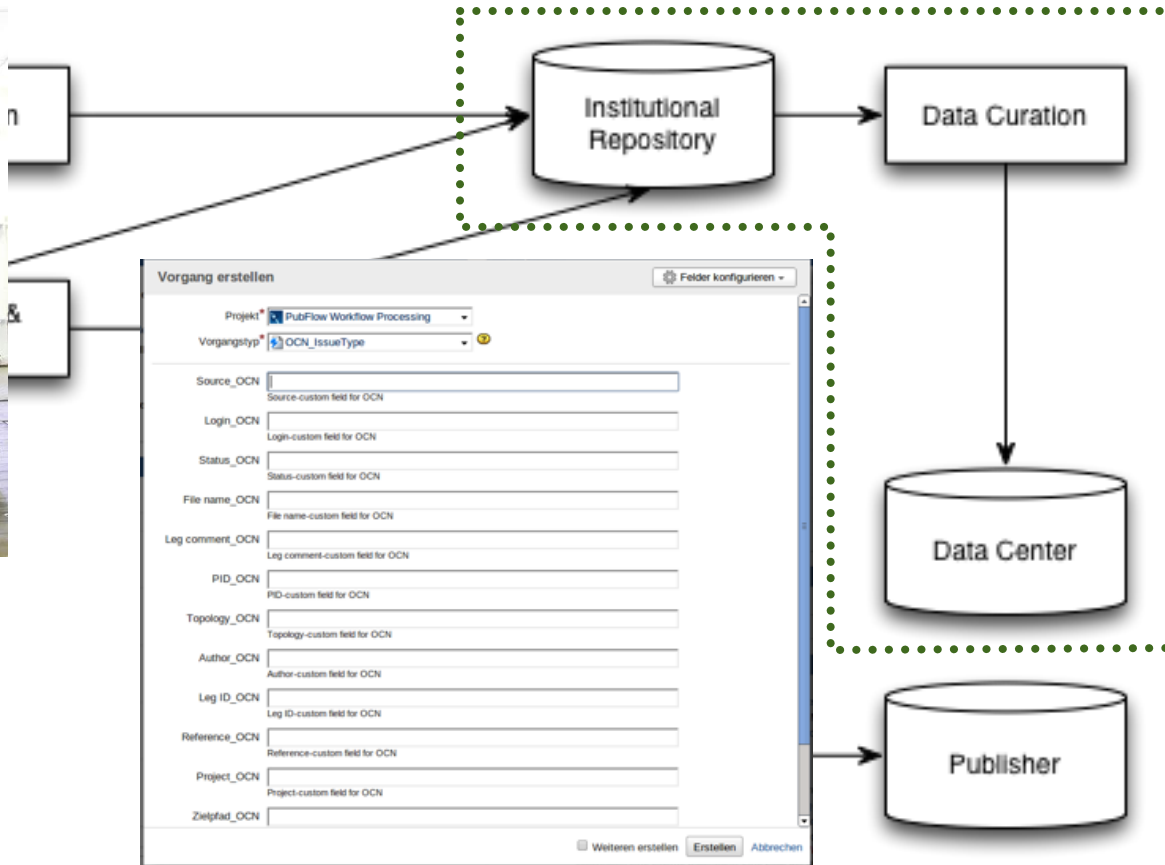

# Evaluation Scenario

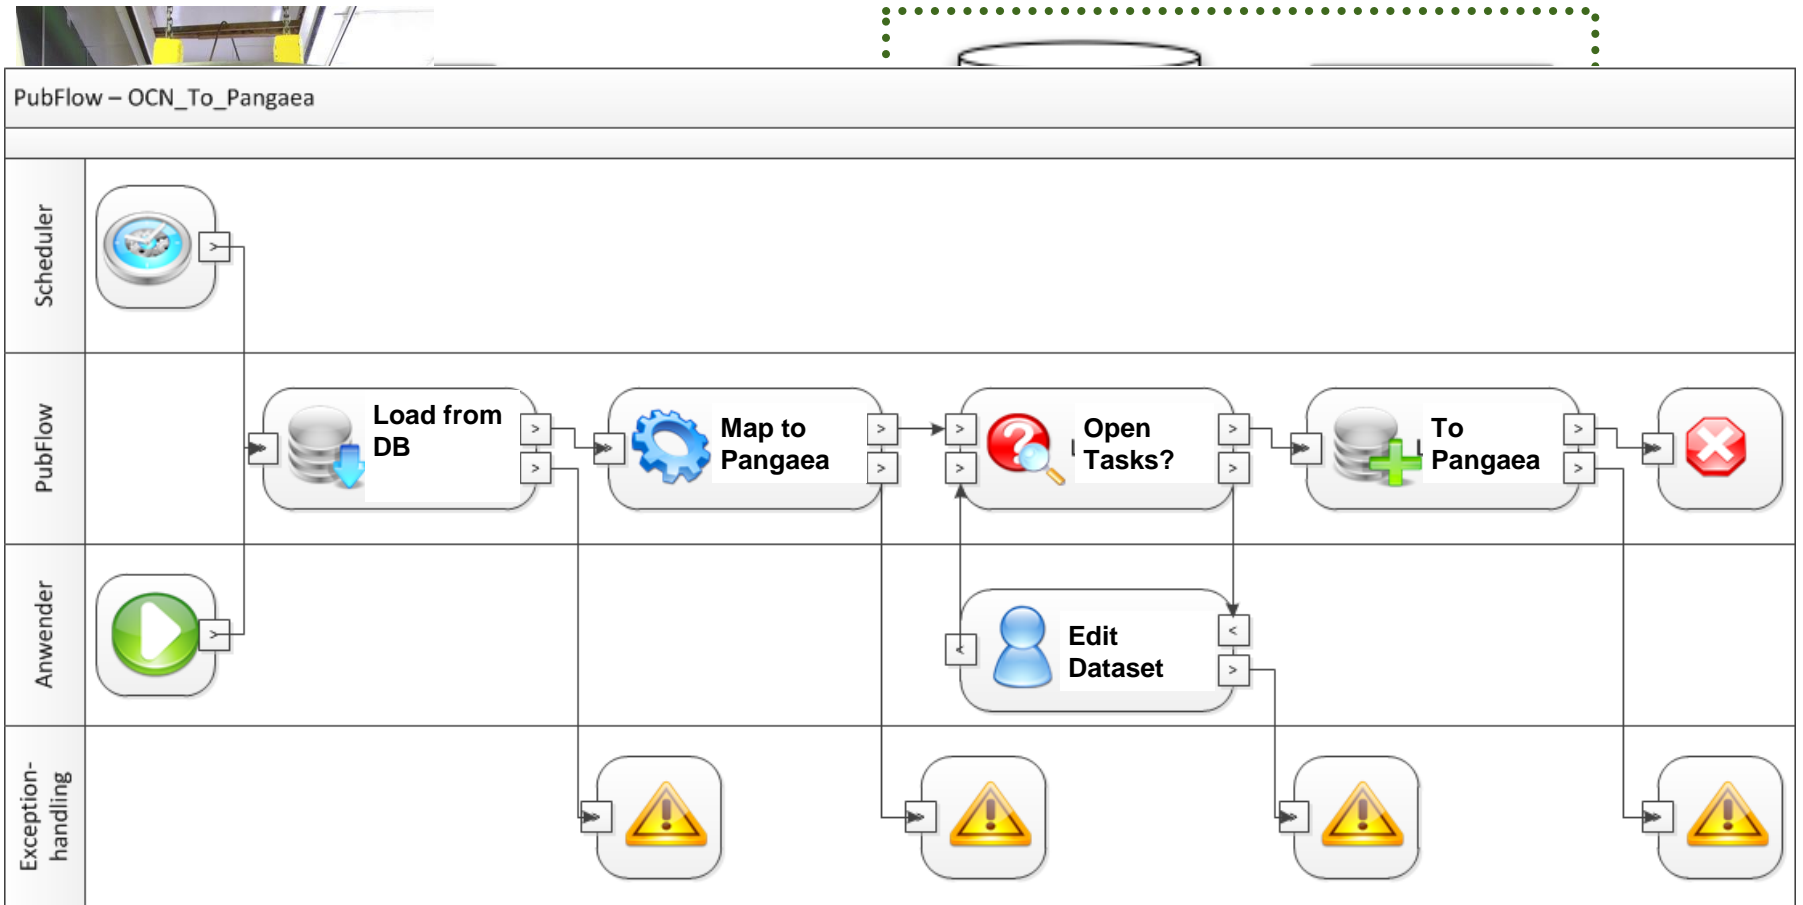

# Evaluation Scenario

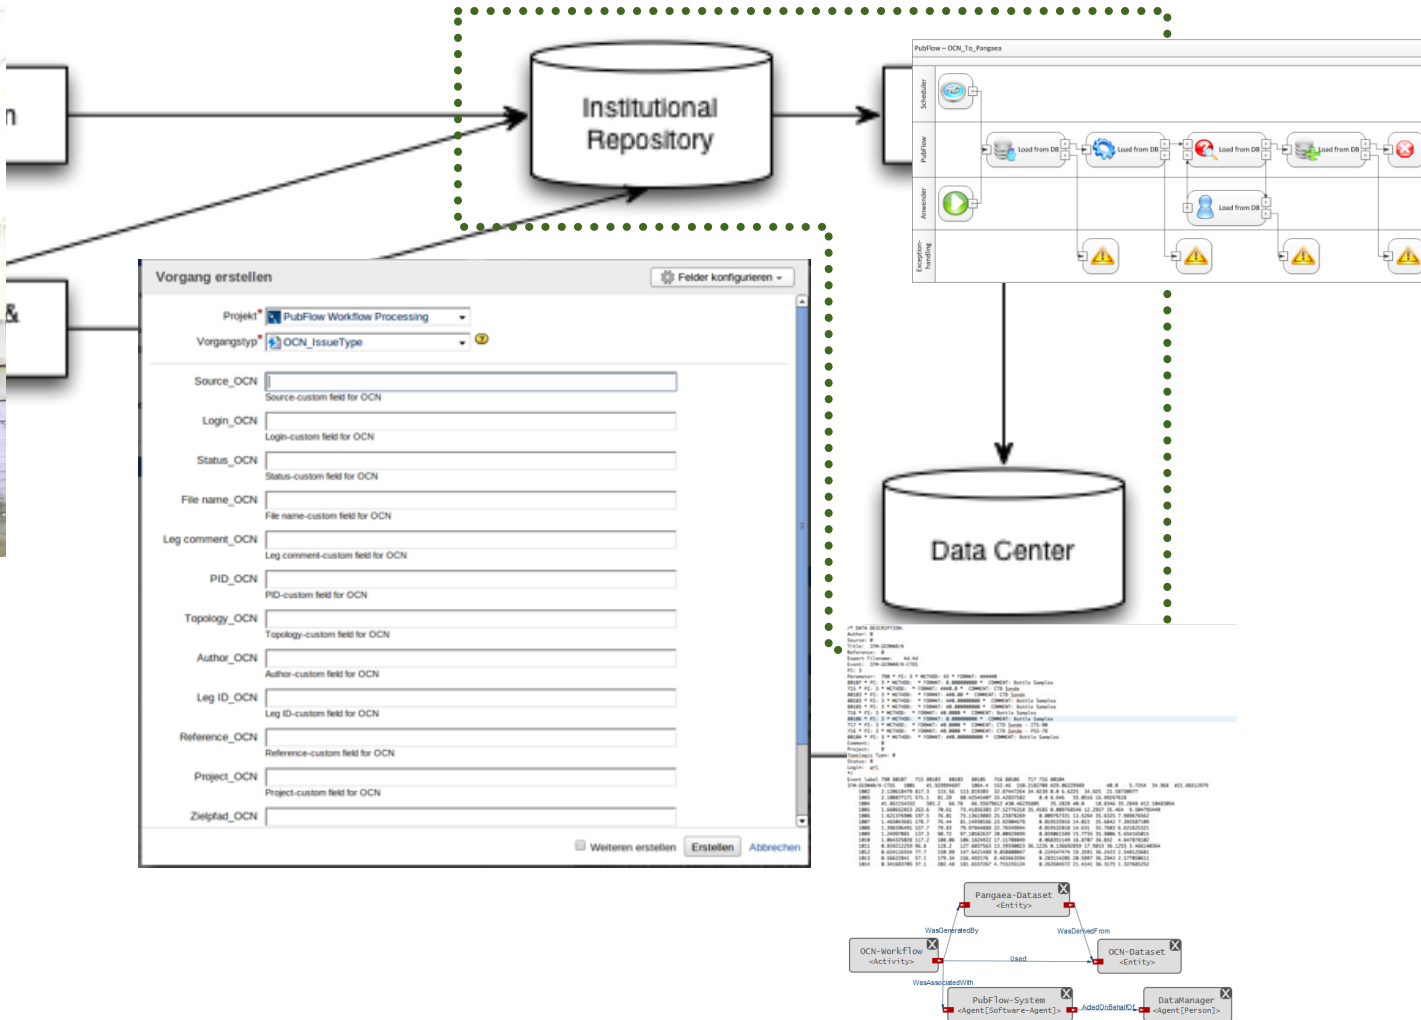

# Evaluation Scenario

# Evaluation Scenario

# Evaluation Scenario

# Conclusion

- ▶ PubFlow increases the degree of automation in the data publication process
- ▶ Is build upon proven workflow technology
- ▶ Brings the division of work to data management
- ▶ Collects provenance information
